L0-4 Asset Operations & Tenant Management

1. Purpose

The **Asset Operations & Tenant Management** value stream defines how RAM operates, maintains, and services its real-estate assets while managing the full tenant lifecycle. It ensures assets are safe, compliant, operationally efficient, and capable of delivering the commercial outcomes defined under **L0-3 Commercial Management**.
This value stream focuses on day-to-day operational excellence, tenant satisfaction, regulatory compliance, and protection of asset value throughout the occupancy lifecycle.

Workflow Diagram (to be inserted): End-to-end Asset Operations & Tenant Lifecycle (Onboarding → Operate → Bill → Service → Exit)

---

2. Scope

This value stream applies to all operational and tenant-facing activities, including:

- Property and site management
- Facilities and maintenance management (hard & soft services)
- Tenant services and relationship management
- Billing, collections, and service charges
- Health, Safety & Environmental (HSE) management

The scope covers activities from tenant onboarding through ongoing occupancy to lease exit and handover.

---

3. Ownership and Accountability

- **Process Owner (L0):** Head of Property / Facilities Management
- **Executive Sponsor:** Chief Operating Officer (COO)
- **Key Stakeholders:** Property Operations, Facilities, Finance, Leasing, Procurement, HSE, IT

---

4. Applicable Policies

- Property Management Policy
- Facilities & Maintenance Policy

- Health, Safety & Environment (HSE) Policy
- Service Charge Policy
- Delegation of Authority (DoA)
- Vendor & Contract Management Policy
- Records Management Policy

These policies define service standards, safety requirements, approval thresholds, vendor controls, and documentation obligations for all activities under this value stream.

---

5. L1 Process Overview

The Asset Operations & Tenant Management value stream is decomposed into the following L1 processes:

1. **L1-4.1 Property Management**
2. **L1-4.2 Facilities & Maintenance Management**
3. **L1-4.3 Tenant Services & Relationship Management**
4. **L1-4.4 Billing, Collections & Service Charges**
5. **L1-4.5 Health, Safety & Environmental Management**

Each L1 process is governed by this L0 framework and executed through defined L2 procedures and L3 work instructions.

L1-4.1 Property Management

Description

Manages day-to-day property operations to ensure assets are functional, compliant, and aligned with lease obligations and agreed service standards.

Objectives

- Ensure uninterrupted property operations
- Maintain asset condition and compliance
- Coordinate on-site services effectively

Inputs

- Lease agreements and service level requirements
- Asset condition data

- Approved operating budgets

Outputs

- Operational property plans
- Inspection and compliance reports

RACI

- **R:** Property Manager
- **A:** Head of Property / FM
- **C:** Facilities, Finance, Leasing
- **I:** Asset Management

Delegation of Authority (DoA)

- Approval of site-level operational plans
- Escalation of material service or compliance issues

KPIs

- Property availability
- Number of non-compliance findings
- Service response times

SAP / Digital Enablement

- SAP RE-FX: property and unit master data
- Property management systems: inspection and site logs

Workflow Diagram (to be inserted): Property Operations Planning & Control

L2 Procedures

L2-4.1.1 Property Operations Planning

Defines site-level operational plans, staffing, and service coverage.

L2-4.1.2 Property Inspections & Condition Monitoring

Routine inspections to assess asset condition, statutory compliance, and lease obligations.

L2-4.1.3 Coordination of On-Site Services

Coordination and supervision of security, cleaning, landscaping, utilities, and other on-site services.

L3 Work Instructions (Examples)

- Perform scheduled property inspection and log findings
- Update property condition report in system

Records & Forms: Property Inspection Checklist, Site Operations Log

---

L1-4.2 Facilities & Maintenance Management

Description

Plans and executes preventive and corrective maintenance to protect asset integrity, safety, and service continuity.

Objectives

- Minimize asset downtime
- Extend asset lifecycle
- Ensure compliance with technical and safety standards

Inputs

- Maintenance schedules
- Tenant maintenance requests
- Asset criticality data

Outputs

- Completed maintenance work orders
- Updated asset maintenance history

RACI

- **R:** Facilities / Maintenance Team
- **A:** Head of Property / FM
- **C:** Procurement, Finance
- **I:** Asset Management

Delegation of Authority (DoA)

- Approval of maintenance expenditures within limits
- Vendor assignment and escalation

KPIs

- Mean Time to Repair (MTTR)
- Preventive maintenance compliance rate
- Maintenance cost variance

SAP / Digital Enablement

- SAP PM: maintenance planning, work orders, asset history

Workflow Diagram (to be inserted): Preventive & Corrective Maintenance Lifecycle

L2 Procedures

L2-4.2.1 Preventive Maintenance Planning

Defines maintenance schedules based on asset criticality and statutory requirements.

L2-4.2.2 Corrective Maintenance Execution

Manages reactive maintenance requests, prioritization, and repairs.

L2-4.2.3 Vendor Performance Management

Monitors service provider performance against SLAs and contracts.

L3 Work Instructions (Examples)

- Create and assign work order in SAP PM
- Verify completion and close maintenance request

Records & Forms: Maintenance Request Form, Work Order Report

L1-4.3 Tenant Services & Relationship Management

Description

Manages tenant interactions, service requests, complaints, and communications to ensure a consistent and positive tenant experience.

Objectives

- Maintain tenant satisfaction and retention
- Ensure timely resolution of tenant issues
- Support compliance with lease obligations

Inputs

- Tenant service requests
- Lease terms and service commitments

Outputs

- Resolved tenant issues
- Tenant communication records

RACI

- **R:** Tenant Services Team
- **A:** Property Manager
- **C:** Facilities, Leasing
- **I:** Asset Management

Delegation of Authority (DoA)

- Approval of goodwill actions or service remedies

- Escalation of material tenant disputes

KPIs

- Tenant satisfaction score
- Average request resolution time
- Number of recurring complaints

SAP / Digital Enablement

- CRM / Service management tools
- SAP RE-FX: tenant master data

Workflow Diagram (to be inserted): Tenant Request & Complaint Handling

L2 Procedures

L2-4.3.1 Tenant Request & Complaint Handling

Receives, tracks, and resolves tenant service requests and complaints.

L2-4.3.2 Tenant Communication & Engagement

Manages formal notices, announcements, and engagement initiatives.

L3 Work Instructions (Examples)

- Log tenant request in service system
- Communicate resolution and close ticket

Records & Forms: Tenant Service Request Form, Communication Log

---

L1-4.4 Billing, Collections & Service Charges

Description

Ensures accurate billing, efficient collection, and transparent recovery of service charges in accordance with lease terms.

Objectives

- Protect revenue streams
- Maintain transparent tenant accounts
- Ensure compliance with billing policies

Inputs

- Lease billing schedules
- Service charge budgets and actual costs

Outputs

- Tenant invoices
- Collection and reconciliation reports

RACI

- **R:** Finance / AR Team
- **A:** CFO / Head of Property (per DoA)
- **C:** Property Management
- **I:** Asset Management

Delegation of Authority (DoA)

- Approval of write-offs and payment plans
- Escalation of delinquent accounts

KPIs

- Days Sales Outstanding (DSO)
- Collection rate
- Service charge variance

SAP / Digital Enablement

- SAP RE-FX: rent and service charge billing

- SAP FI-AR: receivables and collections

Workflow Diagram (to be inserted): Billing, Collections & Service Charge Recovery

L2 Procedures

L2-4.4.1 Rent & Service Charge Billing

Generates periodic tenant invoices based on lease terms.

L2-4.4.2 Collections & Follow-Up

Tracks receivables, manages overdue balances, and escalations.

L2-4.4.3 Service Charge Reconciliation

Reconciles actual costs against recoveries and prepares statements.

L3 Work Instructions (Examples)

- Run billing cycle in SAP RE-FX
- Post receipts and reconcile tenant account

Records & Forms: Invoice Register, Service Charge Statement

L1-4.5 Health, Safety & Environmental Management

Description

Ensures compliance with health, safety, and environmental regulations and internal standards across all managed assets.

Objectives

- Prevent accidents and incidents
- Ensure regulatory compliance
- Promote a safe environment for tenants and staff

Inputs

- Regulatory requirements
- Site inspection results
- Incident reports

Outputs

- HSE inspection and audit reports
- Closed corrective and preventive actions

RACI

- **R:** HSE Team / Site Management
- **A:** Head of Property / FM
- **C:** Legal, Operations
- **I:** Executive Management

Delegation of Authority (DoA)

- Approval of corrective actions
- Escalation of serious incidents

KPIs

- Number of incidents
- Audit findings closed on time
- HSE compliance rate

SAP / Digital Enablement

- HSE management systems
- SAP PM: safety-related maintenance

Workflow Diagram (to be inserted): HSE Inspection, Incident & CAPA Lifecycle

L2 Procedures

L2-4.5.1 HSE Inspections & Audits

L2-4.5.2 Incident Reporting & Investigation

L2-4.5.3 Corrective & Preventive Actions

L3 Work Instructions (Examples)

- Record incident in HSE system
- Perform root cause analysis and close action

Records & Forms: Incident Report Form, HSE Inspection Checklist

---

6. Risk & Control Considerations

- **Operational Risk:** Asset deterioration, service disruption
- **Safety Risk:** Accidents, regulatory breaches
- **Financial Risk:** Revenue leakage, unapproved costs
- **Controls:** Preventive maintenance programs, SLAs, approval workflows, system-based billing and incident tracking

---

7. Audit & Compliance Notes

- All operational activities must be recorded in approved systems
- SAP PM, SAP RE-FX, and SAP FI-AR records constitute primary audit evidence
- HSE documentation must be retained per records management policy

---

8. Guidance to Manual Users

- Refer to L2 procedures for standardized workflows
- Refer to L3 Work Instructions for detailed SAP execution steps
- Use process maps to understand end-to-end operational flows
